

American Century Investments® Equity Growth Fund - A Class

Category
Large Blend

Investment Objective & Strategy

From the investment's prospectus

The investment seeks long-term capital growth by investing in common stocks.

Under normal market conditions, at least 80% of the fund's net assets will be invested in equity securities. In selecting stocks for the fund, the portfolio managers use quantitative management techniques in a two-step process. First, the managers rank stocks, primarily large capitalization, publicly traded U.S. companies with a market capitalization greater than \$2 billion. Second, the portfolio managers use a quantitative model to build a portfolio of stocks from the ranking that they believe will provide the optimal balance between risk and expected return.

Any fees deducted from fund assets are discussed in the fund's prospectus and disclosed in the fund fact sheet. Because these fees are paid on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.
