

Clackamas TimeFrame 2030

The Clackamas TimeFrame 2030 Portfolio is not a registered investment company and is not registered with the Securities and Exchange Commission. It is a private label portfolio that invests in a combination of the investment options ("Underlying Funds") offered under the Clackamas County 457 Deferred Compensation Plan and Clackamas Housing Deferred Compensation Plan ("Plan"), as described below. The asset allocation strategy of the Portfolio is designed for investors who expect to begin receiving benefits around the year 2030. The asset allocation is rebalanced periodically so that it automatically becomes more conservative as the investment horizon shortens and the target date approaches. Like all variable options, these target date funds are subject to market risk and do not guarantee a return of principal even on the target date.

Investment Objective

The investment objective of the TimeFrame 2030 Portfolio is to tailor an asset allocation to an investment horizon similar in length to the stated target date. This Portfolio is rebalanced periodically so that the asset allocation automatically becomes more conservative as the investment horizon shortens. Currently, seventy-seven percent (77%) of the portfolio is allocated to equities and twenty-three percent (23%) is allocated to fixed income securities. The further in the future the target date of the portfolio the more aggressive the underlying investment options in terms of the potential for the greatest investment return as well as the greatest risk.

Principal Risks

All equity (both U.S. and International) and fixed income investments exhibit certain risk characteristics that include the potential for loss of principal value. Generally, the probability of loss of

principal is greater with investment funds that also provide the greatest potential for investment return. International stocks carry additional risks that relate to currency and political uncertainty. The risks of Lifecycle Portfolios are based on the proportionate risk characteristics of the underlying sub-funds described above.

Vanguard® Institutional Index Fund - Institutional Shares

Investment Objective & Strategy

From the investment's prospectus

The investment seeks to track the performance of the S&P 500 Index that measures the investment return of large-capitalization stocks.

The fund employs an indexing investment approach designed to track the performance of the S&P 500 Index, a widely recognized benchmark of U.S. stock market performance that is dominated by the stocks of large U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Investment Objective

The Fund's objective is to provide safety of principal, adequate liquidity and competitive yield with low return volatility.

Investment Strategy

The Fund seeks to achieve its objective by investing in a variety of stable value investments such as Guaranteed Investment Contracts and security backed investment contracts issued by high quality financial institutions (AA rated or higher) as well as stable value collective funds and money market funds. Security backed contracts are backed by high quality, marketable fixed income securities which provide a credited rate of interest based on the yields of the underlying securities. The underlying fixed income security exposure is obtained by investing in collective funds managed directly by the sub-advisor. Securities backing investment contracts are all investment grade at time of purchase with a minimum average quality rating of AA. The various investments that make up the portfolios are blended together to provide a combined daily accrual rate, net of all Fund and portfolio expenses.

Risks

There is no guarantee that the fund will meet its investment objective. While the fund strives to maintain stability of principal, it is possible to lose money by investing in this fund.

Withdrawals and Transfers

Transfers from the Fund to other investment options are allowed at any time, provided:

---The transfer is not directed to a competing investment option;

---A transfer into a competing investment option from any non-competing investment option, or a partial surrender, has not occurred within 90 days.

Transfers or surrenders into a competing investment option, from other than the Fund, are allowed at any time provided that no prior transfers or surrenders from the Fund have occurred within 90 days. A competing investment option is a fund with investment characteristics similar to the Fund as determined by the Fund.

Generally, plan sponsor-initiated withdrawals and transfers may be subject to a 12-month hold on the assets unless waived by the Fund. The Fund also reserves the right to delay or prioritize redemptions for the protection of the Fund and its unit holders should total redemption requests exceed the Fund's liquid assets. Voya Contract surrender charges may also apply.

Notes

The Fund may invest in one or more money market funds advised by the adviser or its affiliates (affiliated money market funds). The Fund's adviser, shareholder servicing agent and/or administrator have contractually agreed to waive fees and/or reimburse expenses in an amount sufficient to offset the respective net fees each collects from the affiliated money market funds on the Fund's investment in such money market funds for all Share Classes. These waivers are in effect through 10/31/25, at which time it will be determined whether such waivers will be renewed or revised. To the extent that the Fund engages in securities lending, affiliated money market fund fees and expenses resulting from the Fund's investment of cash received from securities lending borrowers are not included in Total Annual Fund Operating Expenses and therefore, the above waivers do not apply to such investments.
