Notes

There is no guarantee that any investment option will achieve its stated objective. Principal value fluctuates and there is no guarantee of value at any time, including the target date. The "target date" is the approximate date when an investor plans to start withdrawing their money. When their target date is reached, they may have more or less than the original amount invested. For each target date Portfolio, until the day prior to its Target Date, the Portfolio will seek to provide total returns consistent with an asset allocation targeted for an investor who is retiring in approximately each Portfolio's designation target year. On the Target Date, the Portfolio will seek to provide a combination of total return and stability of principal. The Portfolio's Management Fee structure is a "bifurcated fee" structure as follows: an annual rate of 0.20% of the Portfolio's average daily net assets invested in Underlying Funds within the Voya family of funds, and 0.40% of the Portfolio's average daily net assets invested in direct investments. Total Annual Portfolio Operating Expenses may be higher than the Portfolio's ratio of expenses to average net assets shown in the Portfolio's Financial Highlights, which reflects the operating expenses of the Portfolio and does not include Acquired Fund Fees and Expenses. The adviser is contractually obligated to limit expenses to 1.08% of Class S shares through May 1, 2023. This limitation is subject to possible recoupment by the adviser within 36 months of the waiver or reimbursement. In addition, the adviser is contractually obligated to further limit expenses to 0.98% for Class S shares through May 1, 2023. The limitations do not extend to interest, taxes, investment-related costs, leverage expenses and extraordinary expenses. Termination or modification of these obligations requires approval by the Portfolio's board.
