

Aggressive Growth Portfolio

Asset Allocation Portfolios are multi-asset type investment options that are intended to be managed in accordance with a plan participant's retirement time horizon, long-term return expectations and overall tolerance for risk of principal loss. Since the asset allocation decision is the most important factor in determining investment returns over time, these types of funds provide five "packaged," diversified investment choices for those seeking assistance in making the asset allocation decision. Asset Allocation Portfolios are constructed to provide different long-term investment return and risk characteristics that are determined by their underlying sub-funds. The sub-funds are actively managed U.S. Stock, International Stock and U.S. Bond Funds that are also available as "stand-alone" investment funds.

Investment Objective

The investment objective of the Aggressive Growth Portfolio is to provide long-term growth of capital with income as a minor consideration. Eighty-five percent (85%) of the total fund assets are allocated to equities and fifteen percent (15%) are allocated to fixed income securities. It is the second most aggressive of the five Asset Allocation funds in terms of its potential for the greatest investment return as well as the greatest risk. It is most suitable for participants who are able to remain invested for ten or more years, or who are comfortable with the higher short-term fluctuations that are characteristic of investing in equity markets.

Strategy

The strategy for the Aggressive Growth Portfolio is to invest in a combination of active and passive investments in the following proportions:

--- 5% in the T. Rowe Price Integrated U.S. Small-Cap Growth Equity - I Class, which seeks long-term growth of capital.

--- 5% in the Vanguard® Small-Cap Index Fund - Admiral™ Shares, which seeks to track the performance of a benchmark index that measures the investment return of small-capitalization stocks.

--- 5% in the American Beacon Small Cap Value Fund – R5 Class, which seeks long-term capital appreciation and current income.

--- 5% in the Artisan Mid Cap Fund – Investor Shares, which seeks maximum long-term capital growth.

--- 5% in the Vanguard® Mid-Cap Index Fund – Admiral™ Shares, which seeks to track the performance of a benchmark

index that measures the investment return of mid-capitalization stocks.
--- 5% in the Allspring Special Mid Cap Value Fund - Class R6, which seeks long-term capital appreciation.
--- 10% in the PRIMECAP Odyssey Growth Fund, which seeks to provide long-term capital appreciation.
--- 10% in the Vanguard® 500 Index Fund - Admiral™ Shares, which seeks to track the performance of a benchmark index that measures the investment return of large-capitalization stocks.
--- 10% in the Dodge & Cox Stock Fund, which seeks long-term growth of principal and income; a secondary objective is to achieve a reasonable current income.
--- 5% in the MFS® International Intrinsic Value Fund - Class R6, which seeks capital appreciation.
--- 5% in the Vanguard® Total International Stock Index Fund - Admiral™ Shares, which seeks to track the performance of a benchmark index that measures the investment return of stocks issued by companies located in developed and emerging markets, excluding the United States.
--- 5% in the American Funds® EuroPacific Growth Fund® - Class R-6, which seeks long-term growth of capital.
--- 15% in the Metropolitan West Total Return Bond Fund - Class I Shares, which seeks to maximize long-term total return.
--- 5% in the Baird Short-Term Bond Fund - Institutional Class, which seeks an annual rate of total return, before fund expenses, greater than the annual rate of total return of the Barclays 1-3 Year U.S. Government/Credit Bond Index.
--- 5% in the MetLife Stable Value Fund - Class J, which provides a guarantee of both principal and interest for participant-initiated withdrawals.

Principal Risks

All equity (both U.S. and International) and fixed income investments exhibit certain risk characteristics that include the potential for loss of principal value. Generally, the probability of loss of principal is greater with investment funds that also provide the greatest potential for investment return. International stocks do carry additional risks that relate to currency and political uncertainty. The risks of Asset Allocation Portfolios are based on the

proportionate risk characteristics of the underlying sub-funds described above.
