## Notes

The return of principal for the underlying funds in this target date fund is not guaranteed. Fund shares are subject to the same interest rate, inflation and credit risks associated with the underlying bond holdings. Although the target date funds are actively managed for investors on a projected retirement date timeframe, the fund's allocation strategy does not guarantee that investors' retirement goals will be met. The target date is the year in which an investor may begin taking withdrawals. Investment professionals continue to manage each fund for 20 to 30 years after it reaches its target date.
