

# Fidelity® Extended Market Index Fund

**Category**  
Mid-Cap Blend

## Investment Objective & Strategy

### From the investment's prospectus

The investment seeks to provide investment results that correspond to the total return of stocks of mid- to small-capitalization United States companies.

The fund normally invests at least 80% of assets in common stocks included in the Dow Jones U.S. Completion Total Stock Market Index, which represents the performance of stocks of mid- to small-capitalization U.S. companies. The manager uses statistical sampling techniques based on such factors as capitalization, industry exposures, dividend yield, price/earnings (P/E) ratio, price/book (P/B) ratio, and earnings growth to attempt to replicate the returns of the index using a smaller number of securities.

Any fees deducted from fund assets are discussed in the fund's prospectus and disclosed in the fund fact sheet. Because these fees are paid on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges.
