

# Fidelity® Intermediate Treasury Bond Index Fund

**Category**  
Intermediate Government

## Investment Objective & Strategy

### From the investment's prospectus

The investment seeks a high level of current income.

The fund normally invests at least 80% of assets in securities included in the Bloomberg U.S. 5-10 Year Treasury Bond Index. It normally maintains a dollar-weighted average maturity that generally is expected to be between three and 10 years, consistent with that of the index. The advisor uses statistical sampling techniques based on duration, maturity, interest rate sensitivity, security structure, and credit quality to attempt to replicate the returns of the Bloomberg U.S. 5-10 Year Treasury Bond Index using a smaller number of securities.

Past name(s) : Fidelity® Interim Trs Bd Index.

Funds or their affiliates may pay compensation to Voya® affiliates offering a fund. Such compensation may be paid out of distribution, service and/or 12b-1 fees that are deducted from the fund's assets, and/or may be paid directly by the fund's affiliates. Any fees deducted from fund assets are discussed in the fund's prospectus and disclosed in the fund fact sheet. Because these fees are paid on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. If offered through a retirement program, additional fees and expenses may be charged under that program. NOT A DEPOSIT. NOT FDIC INSURED. NOT INSURED BY ANY FEDERAL GOVERNMENT AGENCY. NOT GUARANTEED BY THE INSTITUTION. MAY GO DOWN IN VALUE.
